FRI 24 NOV	16:00- 17:30	S4.1 – Facilitating climate- related decision making (4)	S4.2 – Climate extremes and regional variability (4)	S4.3 – Heatwave in Mediterranean Regions (4)
	09:00- 10:10/10:50	S5.1 – Support adaptation at local scale (4)	S5.2 – Climate modelling and Impact (5)	S5.3 – Risk Management of Drought (3)
	---	---	---	---
	11:00-12:30	S6.1 – Assessing and adapting to coastal and urban flooding risks (4)	S6.2 Climate-Responsive Water Management and Infrastructure (4)	S6.3 Mitigation and adaptation strategies for socio-economic sectors (4)
<hr/>				
12:30-13:00 Reflections on the conference				

## Preliminary Programme

!! UPDATED: 21 Nov 2023 !! (DRAFT 14)

### Day 1 | Wednesday 22 November 2023

Wed <b>22</b> Nov	10:00 – 10:30 (CET) - Registration of participants	Hall
-------------------------	--	------

Wed <b>22</b> Nov	10:30 – 11:00 (CET) - Conference opening and welcome	Room Biagi
-------------------------	--	------------

**Maria Cristina FACCHINI**, SISC President

**Giorgio MAIONE**, Regione Lombardia

**Fabrizio PICCAROLO**, Fondazione Lombardia per l'Ambiente

Wed <b>22</b> Nov	11:00– 12:30 (CET) <b>S1.1 – Local and regional adaptation studies</b> Chair: Antonio BALLARIN DENTI, FLA, Milan, Italy	Room Biagi
-------------------------	---	------------

- 11:00-11:10      Introduction
- 11:10-11:30      **Monitoring, managing, and disclosing adaptation to climate change in the Lombardy Region**  
Gian Luca GURRIERI, Regione Lombardia, Milan, Italy  
Author(s): N. Carfagno, G.L. Gurrieri, M. Lapi, A. Nurce, F. Piccarolo
- 11:30-11:50      **Disinformation and climate sciences: A digital AGORA and a set of digital tools to tackle disinformation supporting adaptation**  
Arianna ACIERNO, CMCC, Lecce, Italy  
Author(s): A. Acierno, M. Buonocore, S. Santin, A. Reder, M. Adinolfi, P. Mercogliano, F. Sanz, J. Barba, A. Moreno, D. Tsabouraki, A. Doulgerakis
- 11:50-12:10      **Enabling Technologies for mapping, modeling and simulation of environmental performance in urban settings. The Application case of a district in north Naples**  
Sara VERDE, University of Naples "Federico II", Naples, Italy  
Author(s): S. Verde, M. Di Palma, F. Dell'Acqua, M. Rigillo
- 12:10-12:30      **Adaptation pathways for agricultural water management: A multi-stakeholder approach in the IMPETUS demo site of Valle dei Laghi (Italy)**  
Giorgia ROBBIATI, B.I.M. Sarca-Mincio-Garda, Tione di Trento TN, Italy  
Author(s): G. Robbiati, M. Dall'Amico, M. Rizzari, S. Cocuccioni, V. D'Alonzo

# SISC2023: Mission Adaptation!

Managing the risk and building resilience

SISC 11<sup>th</sup> Annual Conference  
Milan, 22-24 November 2023

Wed  
**22**  
Nov

11:00– 12:50 (CET)  
**S1.2 – Cyclone and Tropical Storm studies**  
Chair: Claudio CASSARDO, University of Torino, Turin TO, Italy

Room Solesin

- 11:00-11:10 Introduction
- 11:10-11:30 **On the possible relation between Mediterranean tropical-like cyclones and SST**  
**Elenio AVOLIO**, CNR-ISAC, Italy  
Author(s): E. Avolio, C. Fanelli, A. Pisano, M.M. Miglietta
- 11:30-11:50 **Enhancing tropical cyclone rainfall reanalysis and forecasts for anticipatory action using deep learning**  
**Guido ASCENSO**, Politecnico di Milano, Milano, Italy  
Author(s): G. Ascenso, A. Ficchì, M. Giuliani, E. Scoccimarro, L. Cavicchia, L. Magnusson, A. Castelletti
- 11:50-12:10 **Tropical cyclone genesis potential indices in a new high-resolution climate models ensemble: Limitations and way forward**  
**Leone CAVICCHIA**, CMCC, Bologna, Italy  
Author(s): L. Cavicchia, E. Scoccimarro, G. Ascenso, A. Castelletti, M. Giuliani, S. Gualdi
- 12:10-12:30 **An analytical expression for the probability of occurrence of tornadoes as a function of selected meteorological factors**  
**Piero LIONELLO**, University of Salento, Lecce, Italy  
Author(s): R. Ingrosso, P. Lionello, M.M. Miglietta, G. Salvadori
- 12:30-12:50 **Synthetic generation of extra-tropical cyclones' fields with generative adversarial networks**  
**Filippo DAINELLI**, Politecnico di Milano, Milano, Italy  
Author(s): F. Dainelli, R. Taormina, G. Ascenso, E. Scoccimarro, M. Giuliani, A. Castelletti

Wed  
**22**  
Nov

11: 00– 12:10 (CET)  
**S1.3 – Managing Climate-Induced Risks in Forest Ecosystems**  
Chair: Bachisio ARCA, CNR-IBE, Sassari, Italy

Room 4

- 11:00-11:10 Introduction
- 11:10-11:30 **Where to start with climate-smart forest management? Climatic risk for forest-based mitigation**  
**Natalie PIAZZA**, University of Milan, Milan, Italy  
Author(s): N. Piazza, L. Malanchini, E. Nevola, G. Vacchiano
- 11:30-11:50 **Fuelling the fires: An exploration of the drivers of European wildfire risk and the scope for adaptation under the shared socioeconomic pathways**  
**Eva PREINFALK**, IIASA, Graz, Austria  
Author(s): E. Preinfalk, J. Handmer
- 11:50-12:10 **Co-design of fuel management strategies to reduce fire risk in a Mediterranean protected area**  
**Valentina BACCIU**, CNR-IBE, Sassari, Italy  
Author(s): C. Scarpa, M. d'Angelo, M. Salis, L. Del Giudice, V. Bacciu, A. Ventura, B. Arca, P. Duce, G. Pellizzaro

## TERRAFERMA RESTAURANT

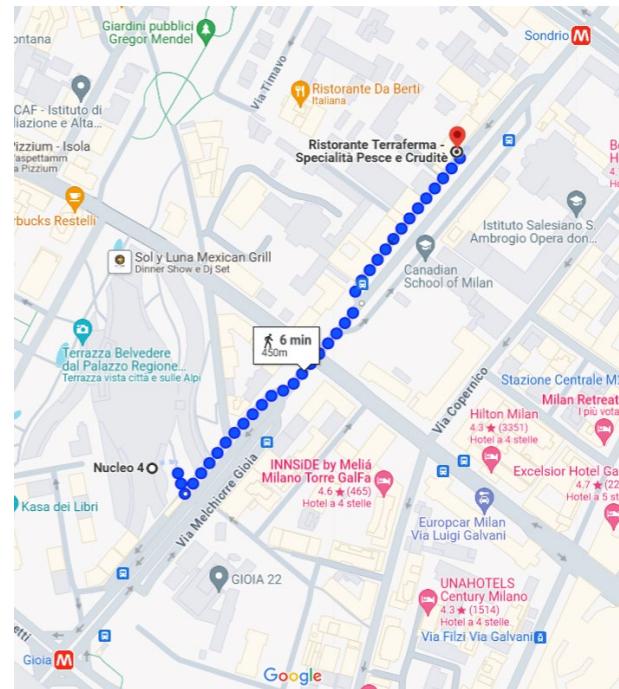

via Melchiorre Gioia 63

Milan

<https://www.ristoranteterraferma.it/>

Terraferma Restaurant is an out-of-the ordinary restaurant located in a very central area of Milan, close to Piazza Città di Lombardia, near the new Piazza Gae Aulenti and the nightlife of Corso Como. Well served by public transport (Line MM3 – Sondrio is the subway stop) the location is elegant, but informal with wooden ceilings and characteristic niches. The staff's welcome is both professional and warm in the kitchen and the dining room. Each day, they work with passion to bring quality and freshness. Ristorante Terraferma's cuisine is straightforward and authentic: pasta and desserts are homemade; fish, fruit and vegetables are carefully selected daily by the chef.

Terraferma is recommended by Eccellenzeitaliane.com

Thu  
**23**  
Nov

09:00 – 10:30 (CET)

**S3.1 – Coastal climate modelling and risk reduction**  
Chair: Andrea Castelletti, Politecnico di Milano, Milan, Italy

Room Biagi

- 09:00-09:10 Introduction
- 09:10-09:30 **Using an artificial neural network to assess geo physical parameters evolution of mediterranean coastal lagoons in response to Climate Change**  
**Piero LIONELLO**, University of Salento, Lecce, Italy  
Author(s): F. Bozzeda, P. Lionello
- 09:30-09:50 **Global coastal risk assessment: A new flexible application in ARIES**  
**Marco BIDOIA**, Fondazione Eni Enrico Mattei, Venice, Italy  
Author(s): M. Bidoia, C. Giupponi
- 09:50-10:10 **A two-tier machine learning methodology for the estimate of the impact frequency in the Veneto coastal area**  
**Davide M. FERRARIO**, IUSS PAVIA / Università Ca' Foscari - Venezia, Venice, Italy  
Author(s): M.K. Dal Barco, M. Maraschini, D.M. Ferrario, N.D. Nguyen, O. Rufo, H. Labella Fonseca, R. Harris, S. Gottardo, E. Tosarin, S. Vascon, S. Torresan, A. Critto
- 10:10-10:30 **The PRINTFLOODS project: Increasing climate resilience in coastal areas through enhanced flood predictions**  
**Andrea FICCHÌ**, Politecnico di Milano, Milan, Italy  
Author(s): A. Ficchì, A. Castelletti

Thu  
**23**  
Nov

09:00 – 10:10 (CET)

**S3.2 – Climate adaptation strategies (health and wellbeing)**  
Chair: Maria Cristina Facchini, ISAC CNR, Bologna, Italy

Room Solesin

- 09:00-09:10 Introduction
- 09:10-09:30 **Increase in airborne allergenic pollen in Trentino (North Italy): knowledge to adapt to climate change**  
**Fabiana CRISTOFOLINI**, Fondazione Edmund Mach, San Michele all'Adige, Trento, Italy  
Author(s): F. Cristofolini, A. Cristofori, R. Barbiero, E. Gottardini
- 09:30-09:50 **Temperature anomalies and health capital: Long-term consequences of exposure in critical periods**  
**Giulia VALENTI**, Ca' Foscari University of Venice, Venice, Italy  
Author(s): Ca. Midões, F. Vona, E. De Cian
- 09:50-10:10 **Adapting to heat extremes with unequal access to cooling: Evidence from India**  
**Filippo PAVANELLO**, University of Bologna, Padova, Italy  
Author(s): F. Pavanello, I.S. Wing

Room Biagi

- [P18] Δῆμος-κράτος: strategies and instances for participatory democracy in response to inattention to ongoing emergencies

Alfredo REDER, CMCC, Caserta, Italy  
Author(s): M. Di Giorgio, A. Reder, P. Mercogliano

- [P19] Clustering of peak energy demand for cooling over the past two decades

Oreste CATTANEO, CMCC, Bologna, Italy  
Author(s): E. Scoccimarro, O. Cattaneo, S. Gualdi, F. Mattion, A. Bizeul, A. Martin Risquez, R. Quadrelli

- [P20] A new dataset of daily observations from a dense network of weather stations covering the Extended Alpine Region

Giulio BONGIOVANNI, University of Trento, Baldassero D'Alba, Italy  
Author(s): G. Bongiovanni, M. Matiu, A. Crespi, A. Napoli, B. Majone, D. Zardi

- [P21] Smallholder livestock farmers coping and adaptation strategies to agricultural drought in South Africa

Yonas BAHTA, University of the Free State, Bloemfontein, South Africa

- [P22] Changes in extreme precipitation in Poland along with progressive warming of climate

Iwona PINSKWAR, Poznań University of Life Sciences, Poznań, Poland  
Author(s): I. Pińskwar, A. Choryński

- [P23] Building climate-ready cities: The role of extreme events analysis

Cristina LAVECCHIA, Fondazione OMD, Milano, Italy  
Author(s): C. Lavecchia, S. Pilati, G. Frustaci

- [P24] Towards multi-hazard, border-independent exposure analysis for operational climate and disaster risk preparedness applications

Piero CAMPALANI, Eurac Research, Bolzano, Italy  
Author(s): P. Campalani, K. Renner, A. Crespi, S. Steger, M. Moreno, M. Pittore

- [P25] Leveraging machine learning as a key digital tool to model environmental processes

Silvia TORRESAN, CMCC, Venice, Italy  
Author(s): E. Furlan, A. Bianconi, F. Zennaro, C. Simeoni, H.V. Pham, S. Vascon, S. Torresan, A. Critto, A. Marcomini

- [P26] A pan-European analysis of drought events and impacts

Martina MERLO, Politecnico di Milano, Milan, Italy  
Author(s): M. Merlo, M. Giuliani, Y. Du, I. Pechlivanidis, A. Castelletti

- [P27] BRIANZA CLIMATE CHANGE: Adaptation through planning of urban green areas

Simone PICCO, FLA, Robbiate, Italy  
Author(s): S. Picco, F. Oggionni, S. Fontana, M. Lapi, A. Ballarin Denti

- [P28] Pedestrian thermal comfort mapping and utilization of shade for heat adaptation in the Suwon city

Gayoung YOO, Kyung Hee University, Yongin-si, South Korea  
Author(s): G. Yoo, J. Hong, Y. Chae, J.H. Hwang

- [P29] Climate litigation and adaptation issues: Strategic approaches from Europe

Elisa FIORINI BECKHAUSER, CMCC, Lecce, Italy  
Author(s): E. Fiorini Beckhauser, G. Galluccio

[P30] **Vulnerable municipalities: Revitalization processes of Polish towns in the context of extreme meteorological events**

**Adam CHORYŃSKI**, Poznań University of Life Sciences, Poznań, Poland

Author(s): A. Choryński, I. Pińskwar, M. Krzyżaniak

[P31] **The laboratory of alpine climatology**

**Fiorella ACQUAOTTA**, University of Turin, Turin, Italy

Author(s): F. Acquaotta, C. Viani, A. Baronetti, D. Guenzi, E. Reguzzoni, M. Giardino

[P32] **Fiber optic sensors for environmental monitoring**

**Andrea MADASCHI**, Politecnico di Milano, Milano, Italy

Author(s): M. Ferrario, J. Morosi, M. Brunero, A. Madaschi, D. Bodanapu, L. Albertelli, P. Martelli

[P33] **Public communication of science with territorial relevance: Challenges and learnings from an experience of climate change adaptation.**

**Catalina AMIGO**, University of Chile, Santiago, Chile

Author(s): R. Fuster, M. Fleischmann, C. Amigo, M. Billi, R. Bórquez, M. Cuevas, C. Escobar, I. Irarrázabal, H. Moya, J. Rauld, K. Silva

**How can we balance adaptation measures with mitigation targets in a changing climate? The case of the Energy sector**

**Alberto Troccoli**

World Energy & Meteorology Council / Inside Climate Service srl

The energy sector is one of the main emitters of greenhouse gases. It must therefore be a key actor in trying to avert the ever-worsening damage caused by the impacts of climate change through the global energy transition towards renewable energy (RE). As these RE resources are largely driven by weather factors, it is critical to understand and predict the effect of the variability of relevant meteorological variables on RE generation, as well as on energy demand, itself also dependent on weather. Moreover, climate change poses increasing risks to energy infrastructure such as damages to pylons and lines due to fire or storms, to substations due to flooding, etc. It may also affect the provision of energy due to changing conditions of events like wind lulls (for wind power), droughts (for hydro power), heat waves (for energy demand), etc.. After reviewing some of the many ways in which climate and energy interact with each other, this talk will explore some of currently identified climate risks for energy production and infrastructure, also comparing adaptation and mitigation costs for the energy sector. While implementation of some climate adaptation options looks inevitable it is important not to divert the attention from mitigation actions.

# SISC2023: Mission Adaptation!

Managing the risk and building resilience

SISC 11<sup>th</sup> Annual Conference  
Milan, 22-24 November 2023

*Alberto Troccoli* is the co-founder and Managing Director of the World Energy & Meteorology Council, co-founder and CEO of Inside Climate Service srl, and a visiting professor at the University of East Anglia (UK). He has over 25 years of experience in the fields of meteorology and climate, and in the last 15 years has been exploring their applications to the energy, and other, sectors. His career includes time at several leading institutions such as NASA, ECMWF (UK), the University of Reading (UK) and CSIRO (Australia). Alberto has published extensively and is also the chief editor and an author of four books. He is also the main author of a few United Nation's World Meteorological Organization's publications such as the Global Framework for Climate Services' Energy Sector Exemplar (2017), the Integrated Weather and Climate Services in Support of Net Zero Energy Transition (2023), and the 2022 Year in review: Climate-driven Global Renewable Energy Potential Resources and Energy Demand (2023, upcoming). He is also the leader of the Copernicus Climate Change Service's Energy operational service. In addition, he has led the development of the Teal tool (<https://tealtool.earth>), a user-friendly free interactive visualisation tool which allows global historical climate and carbon emissions data (and soon climate projections too) to be easily visualised, understandable and accessible. Alberto holds a PhD in Physical Oceanography from the University of Edinburgh (UK).
